

Survey Area: Escambia County segment FLES1-035 (Fort Pickens NPS).

Team Members:

Joey Whibbs – FDEP

Survey Conditions:

During today's survey the skies were sunny, with N wind @ 5-10 knots, and the seas in the Gulf were 2-3 feet. The tide was mid and rising, with low tide (0.02 ft) at 3:41AM early this morning and high tide (0.83 ft) at 4:29 PM this afternoon.

Conditions at Fort Pickens

Survey Summary:

Today FDEP personnel conducted post-response monitoring survey in Escambia County Division 1; segment FLES1-035. Due to the rough seas, the gulf side was not surveyed. In segment FLES1-035 the majority of the oil was found in the STZ. The material was found in a chronic problem area where pieces of oil uncover when the wind blows hard from the north. FDEP personnel mitigated some material from the segment but additional material remains to be addressed. A NRC report was filed for documentation.

There were 190 SRBs and 1.59 lb of BP MC-252 material removed from the beach today by FDEP personnel.

MC-252 Oil Observed

Segment ID	SRBs	SRB Size (cm)	SRB Weight (lb)	NRC Report #	NRC Followup
FLES1-035	190	1.00-9.00	1.59	1079166	No further action

Monitoring Photos:

SRBs mitigated from FLES1-035

Recommendations:

FLES1-035: Segment has been signed out of the response but continues to yield BP MC-252 material. Recommend further periodic monitoring when weather conditions are favorable for product recovery.
