Survey Summary:

Today FDEP personnel conducted a post-response monitoring survey in Escambia County Division 1; segment FLES1-035. The survey was conducted to verify the presence of BP MC252 material and not to collect all observed material. Therefore, only a fraction of the observed material was collected.

There were numerous SRBs and SRPs found in segment FLES1-035. All of the material was found in the STZ in an area that material is chronically exposed.

There were 161 SRBs, 11 SRP’s, and 10.40 lb of BP MC-252 material removed from the beach by FDEP personnel.
